Alphabetical Table of Contents of Titles

- Adaptation to host plants in the fall caterpillar-worm (*Alsophila pometaria*) and its bearing on the evolution of host affiliation in phytophagous insects. Douglas J. Futuyma, Robin P. Cort, and Ineke van Noordwijk, 287
- Adaptive significance of temperature-dependent sex determination in a fish. David O. Conover, 297
- Age structure component of niche width and intraspecific resource partitioning: can age groups function as ecological species? Gary A. Polis, 541
- Altered behavioral responses in intermediate hosts—an acanthocephalan parasite strategy. Janice Moore, 572
- Application of the $-3/2$ power law to clonal herbs. Louis F. Pitelka, 442
- Assessing "optimal" life histories in a fluctuating environment: the evolution of sex-changing by jack-in-the-pulpit. Paulette Bierzychudek, 829
- The behavioral response race between predator and prey. Andrew Sih, 143
- Biological control of olive scale and its relevance to ecological theory. William W. Murdoch, John D. Reeve, Carl B. Huffaker, and C. E. Kennett, 371
- British trees and herbivores: a reevaluation of palatability hypothesis. Seppo Neuvonen, 570
- Can vertebrate predators regulate their prey? Sam Erlinge, Görgen Göransson, Göran Högstedt, Göran Jansson, Olof Liberg, Jon Loman, Ingvar N. Nilsson, Torbjörn von Schantz, and Magnus Sylvén, 125
- Central place foraging for nonfood items: determination of the stick size-value relationship of house building materials collected by eastern woodrats. Mark A. McGinley, 841
- Compensatory intake can be consistent with an optimal foraging model. Neal W. Phillips, 867
- Constraints on the evolution of mutualisms. Henry F. Howe, 764
- Correlation between heterozygosity and rate of chromosome evolution in animals. Jerry A. Coyne, 725
- Detecting population differences in quantitative characters as opposed to gene frequencies. R. C. Lewontin, 115
- Determinants in morphological patterns in communities of Darwin's finches. Dolph Schluter and Peter R. Grant, 175
- Developmental constraints: effect on population growth and patterns of resource allocation in a clonal plant. Maxine A. Watson, 411
- The diatom sex clock and its evolutionary significance. William M. Lewis, 73
- Dispersal of small seeds by big herbivores: foliage is the fruit. Daniel H. Janzen, 338
- Does limited brood capacity link adult size, brooding, and simultaneous hermaphroditism? A test with the starfish *Asterina phylactica*. Richard R. Strathmann, Megumi Strathmann, and Roland H. Emson, 796
- The effect of dispersal on population stability in one-species, discrete-space population growth models. Richard R. Vance, 230
- The effects of size and phylogeny on patterns of covariation in the life history traits of lizards and snakes. Stephen C. Stearns, 56
